

Diesel Service

Worldwide Support

World-Class, Worldwide After-Sales Service and Support

MAN Diesel | PrimeServ

As owners of the former diesel businesses of **Mirrlees Blackstone, Paxman** and **Ruston**, MAN Diesel continues a long and distinguished tradition of diesel engine production and maintenance. The expertise, product knowledge and design information associated with these great names lives on under MAN Diesel PrimeServ UK.

Many of the personnel and engineers from the original organisations are available to support you from our three UK locations at Stockport, Colchester and Stamford. Wherever your operations are based, we provide a comprehensive, top quality after-sales service including installation, commissioning and relocation, together with in-house and on-site training.

Because emergencies do not respect office hours, we make sure that service and support is available around the clock, with highly qualified and experienced specialists and materials available wherever and whenever you need them.

As the original equipment manufacturer, we are the only company to offer genuine spare parts, and we support this with a unique service capability designed to help you keep your engines running, minimise downtime and maintain your business operations as cost effectively as possible.

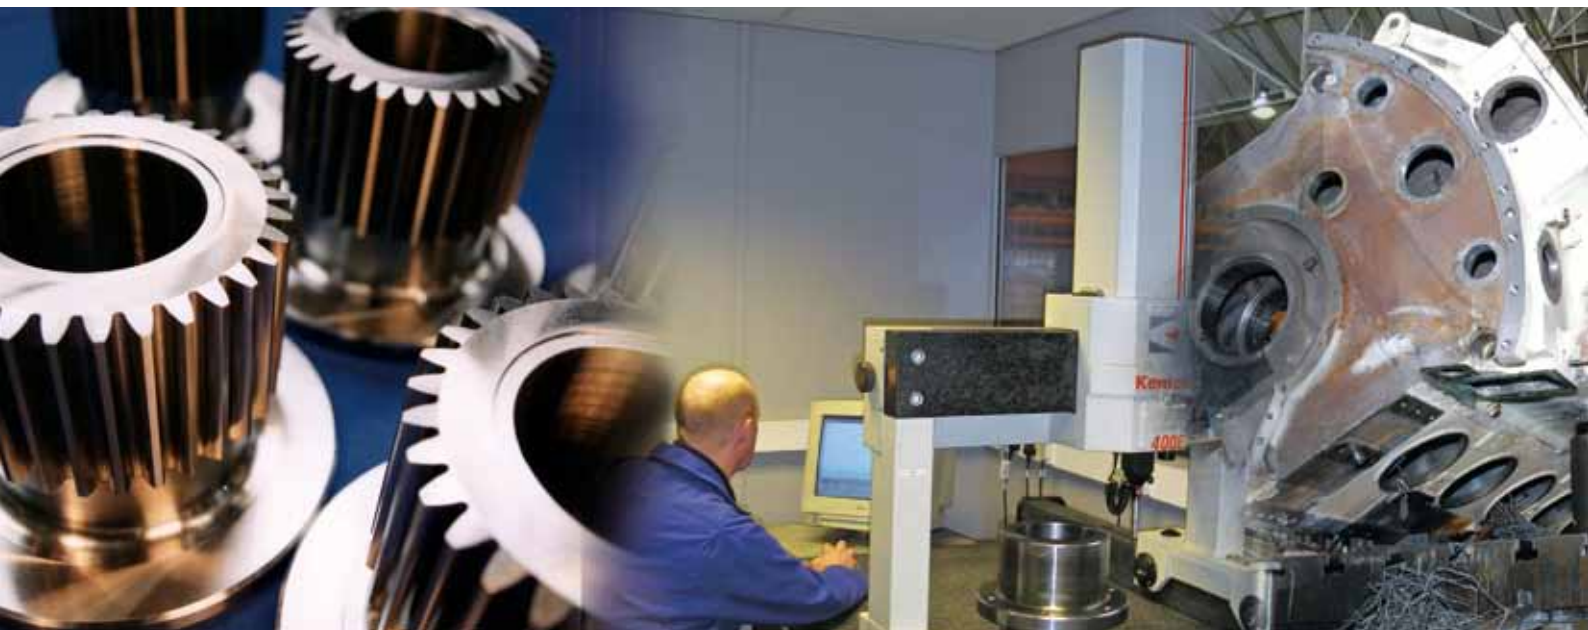

All our engineers are fully trained in the latest diesel engine technology and our support staff can provide technical information, data and advice for every situation, routine or emergency. The engines we support have an unsurpassed reputation for technical excellence, efficiency and reliability, and these same qualities are reflected in MAN Diesel PrimeServ UK after-sales service.

Genuine Spare Parts

We are the only suppliers of OEM spare parts for **Mirrlees Blackstone, Paxman, Ruston** and **English Electric** engines, and all the parts we provide are fully guaranteed and certificated.

Extensive stocks are held at our three UK locations, supported by expert technical advice and rapid order processing, with a 24-hour turn-round in emergency situations.

Our service combines quality, cost-effectiveness and peace-of-mind assurance, helping you to improve operational efficiency and enhance long-term performance.

Delivering Lifetime Confidence Through Worldwide Service

OEM Service

Whether installing or commissioning, delivering planned maintenance programmes or providing routine servicing and maintenance, our highly skilled and experienced engineers will help maintain your engines' performance at optimum levels.

We provide full warranty and breakdown support as well as a range of additional services, including upgrading and relocation, and will liaise closely with suppliers of associated equipment to ensure that complete installations are returned to service speedily and effectively.

Repair & Maintenance Contracts

For added assurance and easier budgeting, our planned servicing can be covered by a Repair & Maintenance contract, tailored to your specific requirements.

Contracts provide significant additional benefits in terms of flexibility, allowing you to plan your operational activities more effectively as well as eliminating delays waiting for parts or engineers to arrive.

Fixed price contracts are ideally suited to out-of-warranty engines, or for any owner-operator looking for guaranteed servicing at competitive, predictable rates.

Factory Based Overhauls

Overhaul and refurbishment represents one of the most effective ways to prolong engine life and minimise lifetime costs, and the facilities at our Colchester Service Centre are among the best in the world.

As the original equipment manufacturer, we specialise in after-sales support for a wide range of **Mirrlees Blackstone**, **Paxman**, **Ruston** and **English Electric** engines.

We provide a variety of services from individual component repairs and refurbishments to full engine overhaul and testing, with every aspect of our service based on rigorous quality standards and supported by top-level technical expertise.

Customer Training

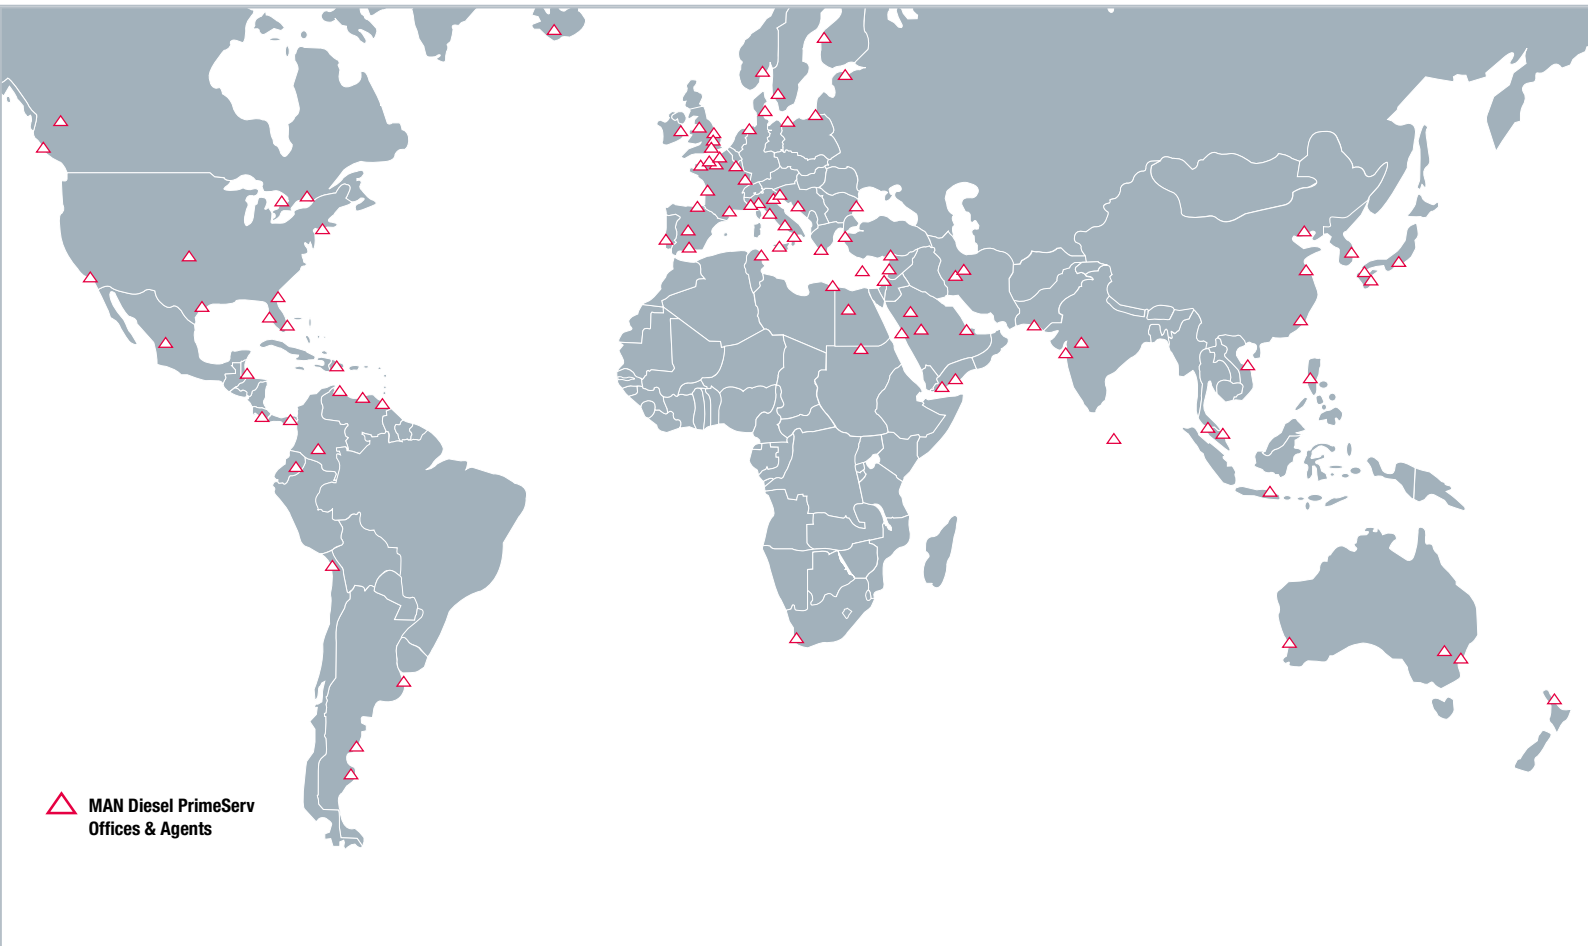

Operational performance and engine life can be significantly enhanced by raising the level of employee skills, and the key to this is expert training.

Courses at our purpose-built Customer Training Centre are of 1 or 2 weeks duration, and provide essential knowledge and practical skills for a wide range of engine types. Training can also be tailored to your specific needs and delivered on site anywhere in the world.
